Assembly

Thread the nylon thread on a long sewing needle.

Begin by pulling the thread through 2 turquoise balls. Take a watermelon and pull through.

Hereafter pull the thread through 3 balls. Take the lemon and pull through.

Now pull the thread through 3 turquoise balls again. Take the last watermelon and pull through.

Finish with the 2 last balls.

Now all balls and fruit are hanging on the nylon thread.

Take a wooden clip and attach it with a solid knot on the end of the chain (See the photos below).

To ensure that the pram chain is really secure, you need to pull the nylon thread back through all parts one more time. Make sure you have enough thread to get back to the starting point.

When you are back where you started, you attach the second wooden clip.

Make sure all balls and fruit are steady and secure before you attach the second clip.

When you are happy with the result, you weave in all ends!

Done!

Enjoy making this pattern :-)
