INFO AND TIPS

If your gauge loosens you can adjust the number of rows per colour. You want each row to equal 4" (10 cm) for each colour, but it cannot be larger than 4" /10 cm or it will not fit your pillow insert. When you start decreasing, you want your gauge to match the increasing rows or you may end up with significantly less rows on your last colour.

The CH-2 always counts as a stitch. Work in the CH-2 space instead of in the CH-2 stitch. It will cause a small hole to appear at the edge, but it will not show once you seam the panels together. As you increase, your stitch count increases 2 STS per row. As you decrease, you'll be decreasing 2 STS per row.

TIP: You'll always work your (SC, CH-1) in the CH-1 space from the previous row.
You'll always increase at the end of your row in the CH-2 SP with an SC, CH-1, SC.

CONSTRUCT

1.) Place your front panel down with either side facing up. With the red at the top and the pink at the bottom.

2.) Place Back Panel 1 on the bottom with the pink stripe facing towards the bottom edge like in the photo above.

3.) Place Back Panel 2 with the red stripe closest to the top of the pillow's edge like in the photo above.

4.) The two back panels should be slightly overlapping with Back Panel 2 on top of panel 1. Otherwise your buttons will be on the wrong side.
5.) Pin down your work with stitch markers. Flip your work around so the colourful side is facing up.

6.) Work in any of the 4 corners. With Colour 9 and a slip knot on your hook, insert your hook into any of the corners. Make sure to go between both panels.

7.) Work 3 SC into the corner. Now SC down the edge of your work. It's approximately 1 SC per row, but you can adjust and skip a row if your work starts to warp due to too many stitches. Work 3 SC into each corner and continue to SC across until you're back around to the first SC. SL ST to the first SC.

8.) Fasten off and sew in all loose ends.

Buttons:
This is optional.

Sew the 3 buttons to the Back Panel 1.

Enjoy!
