Pattern

INFO AND TIPS

The pattern is made by making the front and back pieces first which is then seamed together and then the sleeves are added.

Read the pattern from start to finish before starting to make sure you have a good understanding of how the sweater is worked up.

Choose the size that is closest to your bust measurement. This is intended to be a tight fitted garment, so if you prefer a looser fit, simply go up a size.

The pictures used in this pattern are for a size Small.

Seaming up the sides - working WS facing

Starting from the bottom of the sweater, place a stitch marker in the 56th (56th, 56th, 55th, 54th, 53rd, 51st, 50th, 48th) st on all 4 sides

Fold the sweater in half so the WS is facing, and RS are together

Picture shows sweater folded in half

Seaming the left side with the front of the sweater faces you:

Picking up the loop from where you left off from section 4, slst through the back loop of the first side and the corresponding front loop of the second side 8 times,

Now, slst through the two back loops of the first side and the two corresponding front loops of the second side (*picture to the right*) up to the stitch markers. Do not work into the marked sts. Fasten off. This method will give a smooth finish on the RS of the work.

Needles show the two back loops of the first side and the two front loops of the second side.

The seam on the RS should look like this

Seaming the right side as the front of the sweater faces you:

Attach yarn through the back loop of the first side at the bottom of the sweater, slst through the back loop of the first side and the corresponding front loop of the second side until you reach the stitch markers, do not work the marked stitches. Fasten off. The seam should look the same on both the left and right side of the sweater.
