INFO AND TIPS

These legwarmers can be made in one of three sizes based on the widest part of your calf. However if you need to make yours smaller than size S or larger than size L you can adjust the st count accordingly. To do this your leg warmer circumference needs to measure 3 cm / 1.2 inches less than your calf and you can work out your st count based on 16 dc sts = 10 cm / 4 inches. The length is the same for all sizes but again you can adjust this by adding or removing rows in the main section (before the decreases begin).

Ch2 does not count as a st.
