INFO AND TIPS

Unless otherwise specified, your turning ch does not count as a st throughout.

As your colours change every 2 rows, you can carry your yarn up the sides of your work rather than repeatedly fastening off. You can hide the tails within your seam. I did the same for my sleeve and although there is a slight slope of yarn on the inside, you cannot see it when worn. If you want your side seam to be completely invisible, you may prefer to FO after each colour change and use your ends when seaming.

With RS facing, join A in the st by your shoulder seam at the back right side of your neckline.

Seaming

With WS facing and your body panels flat, lay your sleeve next to your body panels with the sleeve join positioned at the underarm. Place a marker where the base of your sleeve sits as shown. Seam your body panels from bottom hem up to your marker, then continue to join your sleeve. I chose to sew my seams but you could join with sc if you prefer, you will need to work approx. 2sc to each row end.

Weave in all remaining ends and you're done!

Enjoy!

Lauren 😊
