INFO AND TIPS

Seamless color change

Work in the color A until two loops of the last stitch remain on the hook.
Use the color B to complete the stitch.

Tapestry Crochet

A color-changing technique that allows you to work a single row of stitches in more than one color, it is worked very tightly with the non-working color carried inside the stitch.

When working the RS:

When using one color more than once in the same row, crochet working over the unused color parallel to the foundation row, inserting your hook through both loops of your stitch and underneath the unused color and working your stitch as normal.

When working the WS:

When using one color more than once in the same row, make sure to take the unused color of your work to the WS, which is the one facing you. Work the new color, hiding the unused one by carrying it inside the stitch when needed.
